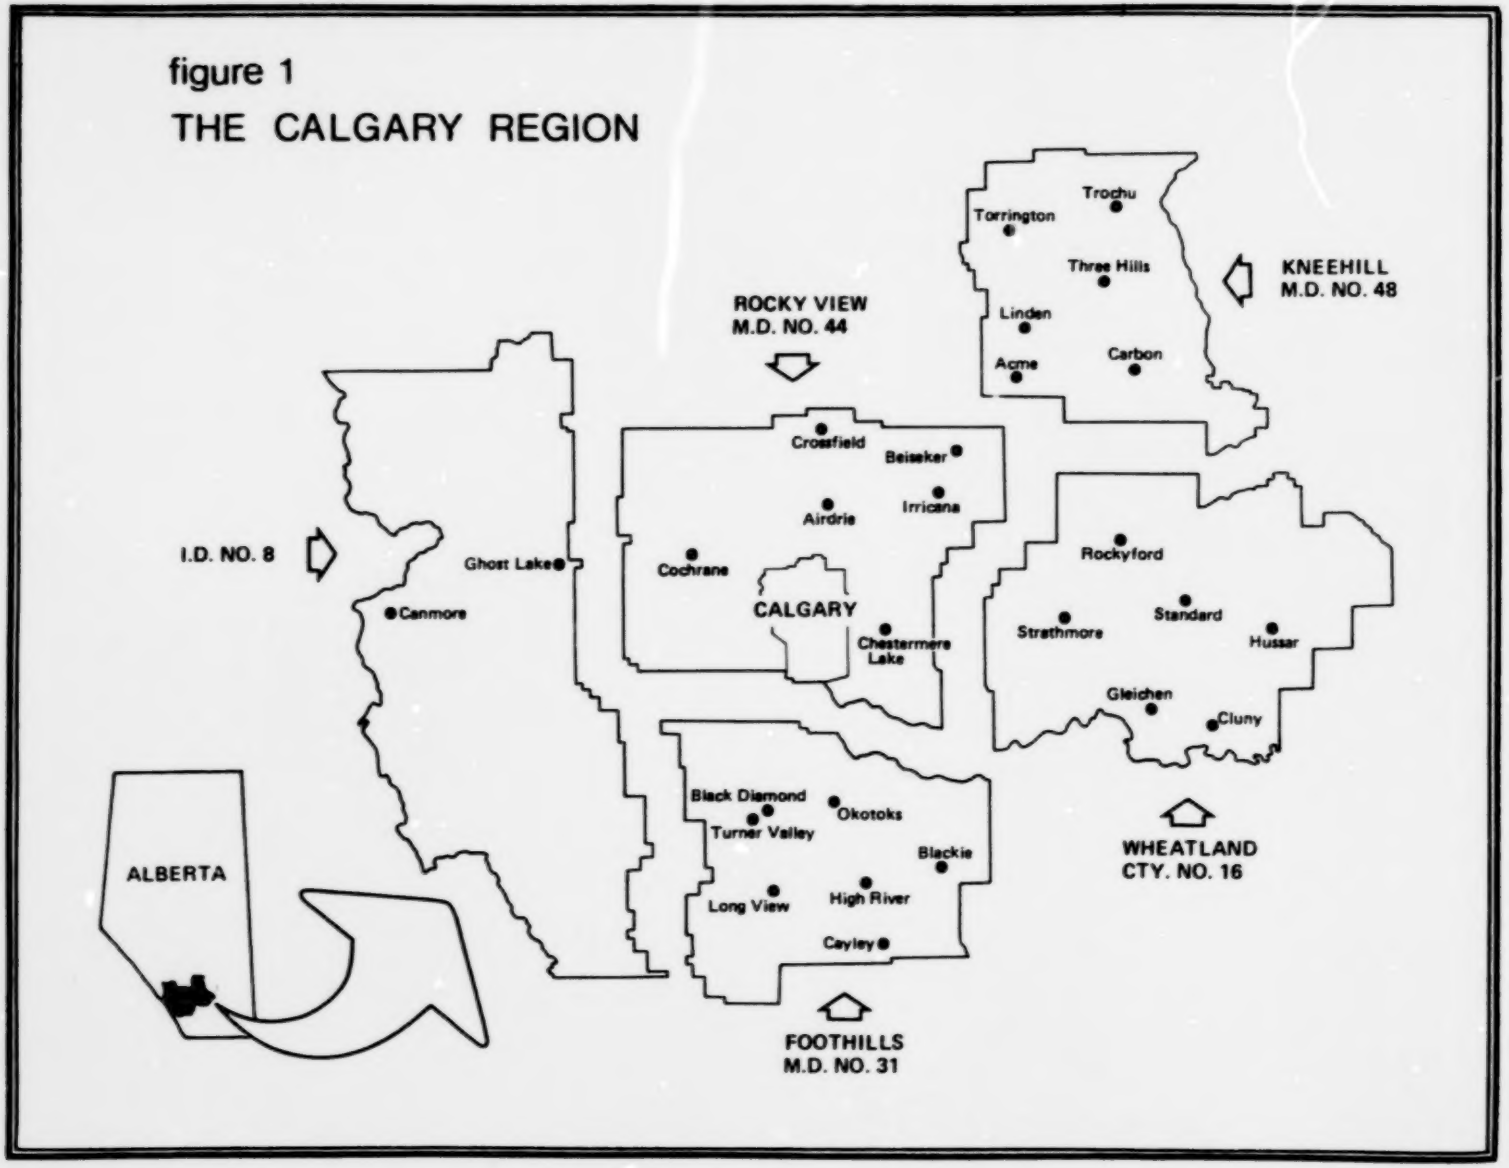
THE CALGARY REGION



Section One

Annexations

Section 1. ANNEXATION

Annexation occurs when land from one municipality is added to another municipality usually for the expansion of urban development. This section outlines the number of applications per municipality and the area added to the municipality through annexations in 1979 and 1980. An aggregate summary chart is also included. This information has been obtained from the Calgary Regional Planning Commission Minutes and the Local Authorities Board.

Section Two

Reclassifications

Section 2. RECLASSIFICATIONS

Reclassification refers to the change in the Regional Plan of a portion of the region from one Density District to another. The process involves an amendment to the Regional Plan. Table 2.1 indicates the number of applications received for reclassifications for each municipality and the land area reclassified in 1979 and 1980.

Section Three

Rural Redesignations

Section 3. RURAL REDESIGNATIONS

Redesignation refers to the change by a municipality in its land use bylaw, of a given area of land from one land use district to another and replaces, in this sense, the common term "to zone" or "rezone".

The following tables indicate the number of redesignations and the number of quarter sections involved from 1971 to 1980[1].

Names given to rural land use districts vary from one municipality to another. The names have been abbreviated in the table below. A summary chart, Table 3.2, includes a comparison of all the rural municipalities referring to the number of quarter sections redesignated and the number of designations made.

TABLE 3.1

Footnotes:

1. In a rural municipality, land is redesignated from one land use district to another by the quarter section.
2. Usual Acres refers to the typical lot size for each land use district.
3. Density refers to the usual number of lots created in the given land use district.

Section Four

Urban Land Use

Section 4 URBAN LAND USE

This section presents statistics on the amount of land included in the various land use districts in urban land use bylaws. The land area in each district was measured using a grid chart from the land use maps current to December, 1980. The total land area of each municipality has also been indicated and this represents the cumulative total of all land use districts.

Section 5 SUBDIVISION

The Calgary Regional Planning Commission is the appointed authority to approve applications for subdivision in the Calgary Region excepting the City of Calgary. Subdivision involves the division of a parcel of land for the purpose of obtaining separate legal title. The applications received and parcels approved are recorded for 1979 and 1980 from the subdivision register.

Section Six
Development

Section 6 DEVELOPMENT

For the purpose of this report, development is determined from Building Permits issued and submitted to Statistics Canada for publication in the following:

1. Statistics Canada Building Permits
   Annual Summary Report, 1979
   Catalogue No. 64-203

2. Statistics Canada Building Permits
   September, 1980
   Catalogue No. 64-001

The total permits issued in 1979 and 1980 are presented in Table 6.1. A breakdown of permits issued in 1980 by dwelling type is also presented.
